

Grain Inspection Advisory Committee Meeting December 2011

**RANDALL JONES
DEPUTY ADMINISTRATOR**

Grain Inspection Advisory Committee Resolutions - June 2011

- **The Advisory Committee recommends that GIPSA moves forward on implementing new diverter type (D/T) check testing procedures at both the export and domestic markets. The Advisory Committee charges GIPSA to replace the current procedures with procedures that focus on safety and reliability such as drop, visual, and installation certification.**

Grain Inspection Advisory Committee Resolutions - June 2011

- The Advisory Committee is concerned that the newly formed Domestic Inspection Operations Office (DIOO) is currently understaffed to properly perform their required duties (equipment, federal appeals, testing, SIMS samples, AMA) and supervise approximately 30 agencies in the domestic market. The Advisory Committee recommends that GIPSA evaluate the number of personnel under the DIOO banner, including what steps will be taken to ensure that GIPSA will be able to facilitate the marketing of grain in the domestic market under the increased workload of DIOO.

Grain Inspection Advisory Committee Resolutions - June 2011

- The Advisory Committee recommends that GIPSA continues to support marketing to Asian markets through the Collateral Duty Officer (CDO) program and explore ways to expand the program. The Advisory Committee suggests that the Agency work with industry, if possible and appropriate, to look at ways this may be accomplished.

Grain Inspection Advisory Committee Resolutions - June 2011

- The Advisory Committee recommends that GIPSA continue to identify new and improve current rapid technology in the area of protein quality (visco-elastic test) and ensure that the results correlate with end users.

Grain Inspection Advisory Committee Resolutions - June 2011

- The Advisory Committee recommends that GIPSA continue working on sorghum odor. In continuing this effort, reach out for industry and end-user feedback to set a storage musty sorghum odor reference that refers to end uses.

Grain Inspection Advisory Committee Resolutions - June 2011

- The Advisory Committee strongly recommends that export user-fees collected and maintained as retained earnings be solely used to support services that facilitate the export of grain and grain related products and not be subject to use for any other purpose.

Grain Inspection Advisory Committee Resolutions - June 2011

- The Advisory Committee recommends that FGIS/GIPSA continue to go forward with the evaluation and adoption of the 149 MHZ technology as the new official standard for grain moisture measurement.

Grain Inspection Advisory Committee Resolutions - June 2011

- The Advisory Committee recommends that GIPSA expedite the scheduled review of the barley standards considering the needs of all stakeholders.
